

Soar to career success from the start at Monash University - World Top 100

At Monash, you're at the centre of everything we do. We offer forward-looking education, focused on preparing you for the rapidly changing world of work. From day one, a Monash education sets you on the path to future career success. We'll make sure you're ready to change the world around you through work-integrated learning experiences and engagement with industry. Developing an enterprising mindset, you'll hone your employability skills and gain a competitive edge in the graduate employment market. Details: www.monash.edu/learning-teaching/innovation

You'll also benefit from the extra choices that come with studying at Australia's largest university. We have more courses, more study options, more research projects, and more international exchanges, giving you a broader education that will set you apart from your peers. We're truly international. With students from over 170 countries, and a presence in Australia, Italy, Malaysia, India, South Africa and China, you'll benefit from a truly global education.

Sprint to the finish. Move from study and into work with our **Career Connect** program, which gives you access to experienced coaches and industry-based professionals. Take part in employability workshops, small-group career conversations and, in your final year, one-on-one coaching.

Career Success Coaching enables you to develop the knowledge to effectively transition from study to work both in Australia and around the world, and supports you to build the skills and gain the insight needed to stand out to employers.

Career Connect also provides you with a range of online resources to support your career development, including building your LinkedIn presence, understanding interviewing techniques and how to navigate diverse employment markets around the world. Details: monash.edu/career-connect

Prepare for success. Our **Student Futures** platform allows you to collate the real-life skills that'll show employers you have what they're looking for, taking into account not just your university activities, but those that are part of your outside life paid work, family responsibilities and contributing to your community.

Student Futures won the NAGCAS Best Practice in Careers Award in 2016 and the ATEM Best Practice in Innovation Award in 2017, the Student Futures platform gives you a competitive employability advantage which is unique to studying at Monash. Details: monash.edu/student-futures

Develop leadership. While studying, you'll be encouraged to foster the skills for effective leadership that'll enable you to positively influence the University, your community and, eventually, the world. At Monash, we understand that anyone can learn to lead and that leadership capability can be developed in all who seek it.

That's why we provide a rich and diverse range of engaging leadership opportunities for you. We want to empower you to take on real-world leadership challenges. Details: monash.edu/students/leadership

Start up business. Monash University accelerator, The Generator, as a key part of developing an entrepreneurial culture at Monash has become one of the most in-demand university startup accelerators. Programs and resources support you to launch ideas that create lasting value in the world. The generator's accelerator program is a three-month intensive to accelerate the growth and impact of your startup. Once a year we provide up to \$20,000 funding, dedicated co-working space and tailored mentoring to 8-12 early stage startups, researchers or social enterprises affiliated with Monash.

Talent put to good use. When you're ready to graduate, you can start your career search without stepping foot off campus. Our employment service, **Monash Talent**, has a team of recruitment specialists who'll connect you with reputable employers and match you with jobs that suit your skills and passions. Detail: monash.edu/talent

The thing that is the most special about Monash is our desire to make a difference. You'll leave with a greater sense of purpose, a global outlook, and the skills and confidence to make a positive change – to your own life, and to the lives of those around you.

Discover our large range of undergraduate, graduate and research courses and the support services, such as scholarships and accommodation we offer. Details: www.monash.edu/

A success story.

A Monash medical graduate is one of just nine students in Australia to be awarded a prestigious 2019 Rhodes Scholarship to study at Oxford University.

Daniel D'Hotman, graduated from Monash this year with a Bachelor of Medicine and a Bachelor of Surgery. Also on his long list of achievements is a Bachelor of Medical Science from the University of Oxford, a Graduate Diploma in Economics from the London School of Economics, a Boston Consulting Group scholarship for his exceptional academic results, and experience as an expedition medic on a 2017 trek across Antarctica to the South Pole.

The interdisciplinary focus of the Monash's double degree course inspired in Daniel the realisation that his greatest impact on people's lives may not take place at the bedside.

“I quickly realised that the biggest way to make a genuine difference to people’s health is not just to treat one patient at a time. It’s actually changing the systems that drive healthcare delivery so we can guarantee a high standard of health for everyone. I believe this can only happen through radical and extensive digital transformation on a global scale,” he said.

“We’re on the verge of an incredible period of disruption and transformation in medicine through technologies like artificial intelligence, precision genomics and advanced analytics.

“I see an enormous opportunity to harness these technologies to create systemic change and provide access to health services to potentially millions of people around the world.”

Professor Bryan Horrigan, Dean of Law said Daniel was one of a new generation of professionals who recognised that large-scale global issues require a creative, interdisciplinary approach to solutions.

“Daniel has the capability to be part of a generation that transcends traditional sector boundaries and solves global problems at scale,” Professor Horrigan said.

Daniel plans to study a Master of Global Health Science and Epidemiology at Oxford, and a doctorate in public policy as a pathway to work in a leadership position at the World Health Organisation or drive health system reform in government.
